

Aashish Chandra

Software Engineer | Distributed Systems & Machine Learning

krovidiaashishchandra@gmail.com

+91 9399988883 | Bengaluru, India

kira1433.github.io | LinkedIn | GitHub

EDUCATION

BITS Pilani, Hyderabad

May 2025

B.E. Computer Science

CGPA: 9.76 / 10.0

Academic Excellence Scholarship

ACADEMIC ROLES

Teaching Assistant

Jan '24 - May '24

Data Structures & Algorithms

Database Management

Systems

Research Assistant

Jul '23 - Dec '24

Computer Vision

Reinforcement Learning

ACHIEVEMENTS

- ICPC Asia West Championship Rank 18
- ICPC Amritapuri Regionals Rank 19
- Codeforces Candidate Master (Top 250 India)

SKILLS

PROGRAMMING

C/C++, Go, Scala, Python,
Java, SQL, Bash

TECHNOLOGIES

Kubernetes, gRPC, Docker,
PyTorch, LangChain, Airflow,
Jenkins, Snowflake, MySQL

DOMAINS

Distributed Systems
Cloud Infrastructure
Machine Learning Systems
Agentic Automations

EXPERIENCE

Software Engineer | Rubrik - Forge

Jun 2025 - Present

- **Designed and shipped** high-availability infrastructure enabling automatic node failover and recovery across Rubrik's newest on-prem platform.
- **Built** a hardware health-monitoring daemon in Scala and gRPC, bridging Kubernetes-based services with on-host processes to give the platform real-time node-health visibility.
- **Re-architected** the legacy networking stack in CDM clusters to enable multi-subnet support, redesigning IP routing and cluster operations workflows.
- **Built** the onboarding subsystem for Oracle Cloud in Go, engineering a least-privilege IAM model and encrypted credential storage.

Machine Learning Engineer | Tower Research Capital

Sep 2024 - May 2025

- **Developed** an ML-based Trade Anomaly Detection system ingesting firm-wide trade data and quantitative strategies to predict anomalous signals.
- **Engineered** a multi-agent workflow system that automates code review and documentation across the firm's C++, Python, and Java codebases.

Software Engineer Intern | Rubrik

May 2024 - Aug 2024

- **Architected** an automated Kubernetes config-validation pipeline that audits ~190-microservice SaaS fleet daily against security/reliability policies.
- **Built** a centralized dashboard for fleet-wide trend analysis, using long-running Jenkins CI/CD jobs.

Applied Science Intern | Amazon

May 2023 - Jul 2023

- **Researched and prototyped** a Virtual Try-On system capable of multiple ASIN imposition to enhance product visualization.

PUBLICATIONS & PROJECTS

Multi-Modal Portrait Animations

WACV 2026

- **Synthesized** high-fidelity character animations from static images, descriptive text, and audio profiles using Transformer-based multi-modal integration.

Deepfake Video Generation

CVPR-W 2024

- **Engineered** a system for realistic facial transfer in videos leveraging Vision Transformers and Diffusion Models.

DRL for Adaptive Bitrate Streaming

IWCMC 2023

- **Optimized** video streaming over simulated 5G/Satellite networks using PPO and A3C reinforcement learning algorithms.
